JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Vol. 30, No. 6, November–December 2007

2007 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 1839–1845, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1846–1847, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1848–1854, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2007, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aeroelasticity and Aeroservoelasticity

G07-151 High-Order Quasi-Linearization Technique for Identification of Linear-Fractional-Transformation-Modeled Aeroservoelastic Systems
G07-029 Global Robust Control of an Aeroelastic System Using Output Feedback
G07-093 Active Flutter Suppression by Feedback Compensation of Transport Logs
G07-110 Multi-Input/Multi-Output Adaptive Output Feedback Control Design for Aeroelastic Vibration Suppression
G07-169 Active Suppression of Flutter in a Typical Airfoil Section Fitted with a Smart Flap

Air Transportation

G07-080 Dynamics of Circularly Towed Aerial Cable Systems, Part 1: Optimal Configurations and Their Stability
G07-081 Dynamics of Circularly Towed Aerial Cable Systems, Part 2: Transitional Flight and Deployment Control
G07-024 Aircraft Landing Scheduling Optimization for Single Runway Noncontrolled Airports: Static Case

Collision Avoidance

G07-052 Space Vehicle Conflict-Avoidance Analysis
G07-194 Effect of Wind Correlation on Aircraft Conflict Probability

Communication and Air Traffic Control

G07-068 Multiple-Target Tracking and Identity Management with Application to Aircraft Tracking
G07-040 New Algorithms for Aircraft Intent Inference and Trajectory Prediction
G07-024 Aircraft Landing Scheduling Optimization for Single Runway Noncontrolled Airports: Static Case

Flight Control Integration

G07-195 Boom and Receptacle Autonomous Air Refueling Using Visual Snake Optical Sensor

Flight Mechanics

G07-189 Modeling and Simulation of Airship Dynamics
G07-086 Flight Dynamics and Control Authority of Flap-Controlled Open Boxes
G07-184 Periodic Solutions in the Planar (n+1) Ring Problem with Oblateness

Flight Operations

G07-147 Separation Analysis Methodology for Designing Area Navigation Arrival Procedures
G07-061 Enhanced Self-Spacing Algorithm for Three-Degree Decelerating Approaches

General Aviation

G07-077 Prediction of Icing Effects on the Dynamic Response of Light Airplanes

Landing Dynamics

G07-006 Aircraft Autolander Safety Analysis Through Optimal Control-Based Reach Set Computation
G07-154 Digital Autoland Control Laws Using Quantitative Feedback Theory and Direct Digital Design

Lighter-Than-Air Systems

G07-149 Three-Dimensional Ascent Trajectory Optimization for Stratospheric Airship Platforms in the Jet Stream
G07-057 Modeling and Near-Space Stationkeeping Control of a Large High-Altitude Airship
G07-065 Cable Control of an Aerostat Platform: Experimental Results and Model Validation
G07-189 Modeling and Simulation of Airship Dynamics

Man/Machine Interface

G07-061 Enhanced Self-Spacing Algorithm for Three-Degree Decelerating Approaches
G07-003 Design and Evaluation of a Haptic Flight Director

Rotorcraft

G07-140 Discrete-Time, Closed-Loop Aeromechanical Stability Analysis of Helicopters with Higher Harmonic Control

Safety

G07-039 Probabilistic Human Pilot Approach: Application to Microburst Escape Maneuver
G07-006 Aircraft Autolander Safety Analysis Through Optimal Control-Based Reach Set Computation

Simulation

G07-039 Probabilistic Human Pilot Approach: Application to Microburst Escape Maneuver
G07-081 Dynamics of Circularly Towed Aerial Cable Systems, Part 2: Transitional Flight and Deployment Control
G07-080 Dynamics of Circularly Towed Aerial Cable Systems, Part 1: Optimal Configurations and Their Stability
G07-194 Effect of Wind Correlation on Aircraft Conflict Probability

System Effectiveness

G07-139 Optimal Control of Sensor Threshold for Autonomous Wide-Area-Search Munitions

Uninhabited and Unmanned Air Vehicles

G07-139 Optimal Control of Sensor Threshold for Autonomous Wide-Area-Search Munitions
G07-180 Simulation and Flight Test of Autonomous Aircraft Estimation, Planning, and Control Algorithms
G07-195 Boom and Receptacle Autonomous Air Refueling Using Visual Snake Optical Sensor
G07-111 Real-Time Nonlinear Embedded Control for an Autonomous Quadrotor Helicopter
G07-154 Digital Autoland Control Laws Using Quantitative Feedback Theory and Direct Digital Design
G07-076 Stability and Control of a High-Altitude, Long-Endurance UAV

Vibration

G07-078 Active Control and Closed-Loop Identification of Flutter Instability in Typical Section Airfoil
G07-117 Use of Least Means Squares Filter in Control of Optical Beam Jitter

Weather Hazards

G07-077 Prediction of Icing Effects on the Dynamic Response of Light Airplanes

G07-013 Automated Route Generation for Avoiding Deterministic Weather in Transition Airspace

COMPUTING, INFORMATION, AND COMMUNICATION

ATC Systems

G07-040 New Algorithms for Aircraft Intent Inference and Trajectory Prediction
G07-024 Aircraft Landing Scheduling Optimization for Single Runway Noncontrolled Airports: Static Case

Autonomous Systems

G07-067 Formation Keeping and Attitude Alignment for Multiple Spacecraft Through Local Interactions
G07-180 Simulation and Flight Test of Autonomous Aircraft Estimation, Planning, and Control Algorithms

Controls and Displays

G07-061 Enhanced Self-Spacing Algorithm for Three-Degree Decelerating Approaches

Distributed Systems and Networking

G07-048 Autonomous and Distributed Motion Planning for Satellite Swarm
G07-067 Formation Keeping and Attitude Alignment for Multiple Spacecraft Through Local Interactions

ENERGY

Fuel Economy

G07-133 Flight Path Optimization at Constant Altitude

FLIGHT SIMULATOR SYSTEMS

Guidance, Navigation, and Control Systems

G07-146 Predictor-Corrector Reentry Guidance Algorithm with Path Constraints for Atmospheric Entry Vehicles
G07-147 Separation Analysis Methodology for Designing Area Navigation Arrival Procedures
G07-128 Launch Vehicle Autopilot Robustness to Multilinear Uncertainties: Analysis in Kharitonov

FLUID DYNAMICS

Plasmadynamics and MHD

G07-166 Neural Optimal Magnetohydrodynamic Control of Hypersonic Flows

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Aircraft Dynamics

G07-089 Control-Oriented Modeling of an Air-Breathing Hypersonic Vehicle
G07-125 Course and Heading Changes in Significant Wind
G07-173 Control and Simulation of Relative Motion for Aerial Refueling in Racetrack Maneuvers
G07-086 Flight Dynamics and Control Authority of Flap-Controlled Open Boxes

Aircraft Guidance

G07-153 Adaptive, Integrated Guidance and Control Design for Line-of-Sight-Based Formation Flight
G07-013 Automated Route Generation for Avoiding Deterministic Weather in Transition Airspace
G07-031 Variable Structure Observer for Control Bias on Unmanned Air Vehicles
G07-010 Sensitivity-Analysis Method for Inverse Simulation Application
G07-161 High-α Flight Maneuverability Enhancement of a Fighter Aircraft Using Thrust-Vectoring Control
G07-144 Near-Optimal Missile Avoidance Trajectories via Receding Horizon Control
G07-094 Unpowered Approach and Landing Guidance with Normal Acceleration Limitations
G07-118 Improved Endurance of Optimal Periodic Flight
G07-125 Course and Heading Changes in Significant Wind
G07-134 Three-Dimensional Aircraft Terrain-Following via Real-Time Optimal Control
G07-115 Adaptive Disturbance Rejection Controller for Visual Tracking of a Maneuvering Target
G07-154 Digital Autoland Control Laws Using Quantitative Feedback Theory and Direct Digital Design
G07-192 Performance and Lyapunov Stability of a Nonlinear Path Following Guidance Method

Aircraft Stability and Control

G07-076 Stability and Control of a High-Altitude, Long-Endurance UAV
G07-036 Nonlinear Flight Control Design Using Constrained Adaptive Backstepping
G07-058 Control of an Aeroelastic System with Actuator Saturation
G07-161 High-α Flight Maneuverability Enhancement of a Fighter Aircraft Using Thrust-Vectoring Control
G07-173 Control and Simulation of Relative Motion for Aerial Refueling in Racetrack Maneuvers
G07-111 Real-Time Nonlinear Embedded Control for an Autonomous Quadrotor Helicopter
G07-011 Optimal Cooperative Reconnaissance Using Multiple Vehicles
G07-004 State-Dependent Riccati Equation Control For Small Autonomous Helicopters
G07-087 Adaptive Nonlinear Neural Controller for Aircraft Under Actuator Failures
G07-180 Simulation and Flight Test of Autonomous Aircraft Estimation, Planning, and Control Algorithms
G07-086 Flight Dynamics and Control Authority of Flap-Controlled Open Boxes
G07-075 Retrofit Fault-Tolerant Flight Control Design Under Control Effector Damage

Artificial Intelligence

G07-048 Autonomous and Distributed Motion Planning for Satellite Swarm
G07-166 Neural Optimal Magnetohydrodynamic Control of Hypersonic Flows

Astrodynamics

G07-165 Analysis and Design For No-Spin Tethered Satellite Retrieval
G07-187 Nonlinear Semi-Analytic Methods for Trajectory Estimation
G07-181 Axial Velocity Solution for Spinning-Up Rigid Bodies Subject to Constant Forces
G07-127 Fuel-Optimal Spacecraft Rendezvous with Hybrid On-Off Continuous and Impulsive Thrust
G07-158 Models for the Comet Dynamical Environment
G07-176 Artificial Equilibrium Points in the Low-Thrust Restricted Three-Body Problem
G07-190 Analytical Charge Analysis for Two- and Three-Craft Coulomb Formations
G07-071 Solutions to the Variational Equations for Relative Motion of Satellites
G07-101 Relative Motion and the Geometry of Formations in Keplerian Elliptic Orbits with Arbitrary Eccentricity
G07-129 Approximate Minimum Energy Control Laws for Low-Thrust Formation Reconfiguration
G07-098 Low-Thrust, High-Accuracy Trajectory Optimization
G07-102 High-Precision, Symplectic Numerical, Relative Orbit Propagation
G07-121 Active Control Schemes to Satisfy Separation Distance Constraints
G07-035 Angles-Only Orbit Updates for Low-Earth-Orbit Satellites
G07-090 Near Earth Object Orbit Modification Using Gravitational Coupling
G07-171 Reachability and Optimal Phasing for Reconfiguration in Near-Circular Orbit Formations
G07-063 Boundedness of Spacecraft Hovering Under Dead-Band Control in Time-Invariant Systems
G07-046 Continuous Thrust Orbit Transfer Optimization Using Large-Scale Linear Programming
G07-079 Nullcline Analysis as an Analytical Tethered Satellite Mission Design Tool
G07-120 Solar Sail Formation Flying Around Displaced Solar Orbits
G07-027 J_2 Effect in Cylindrical Coordinates
G07-069 Repeat-Groundtrack Orbit Acquisition and Maintenance for Earth-Observation Satellites
G07-203 Relative Semimajor Axis Uncertainty in High Earth Orbits
G07-141 Transfer to Distant Retrograde Orbits Using Manifold Theory
G07-073 Periodic Orbits Above the Ecliptic in the Solar-Sail Restricted Three-Body Problem
G07-072 Autonomous Interplanetary Orbit Determination Using Satellite-to-Satellite Tracking
G07-200 Low-Thrust Interplanetary Transfers, Including Escape and Capture Trajectories
G07-160 Long-Term Attitude Drift of Spinning Spacecraft Under Solar Radiation Torques
G07-045 Trajectory Design with Hybrid Low-Thrust Propulsion System
G07-055 Relative Motion Between Satellites on Neighbouring Keplerian Orbits
G07-026 Computation of a Science Orbit About Europa

Autonomous Vehicles

G07-011 Optimal Cooperative Reconnaissance Using Multiple Vehicles
G07-072 Autonomous Interplanetary Orbit Determination Using Satellite-to-Satellite Tracking
G07-087 Adaptive Nonlinear Neural Controller for Aircraft Under Actuator Failures

G07-069 Repeat-Groundtrack Orbit Acquisition and Maintenance for Earth-Observation Satellites
G07-134 Three-Dimensional Aircraft Terrain-Following via Real-Time Optimal Control
G07-149 Three-Dimensional Ascent Trajectory Optimization for Stratospheric Airship Platforms in the Jet Stream
G07-155 State Estimation for Autonomous Flight in Cluttered Environments
G07-168 Robust Decentralized Fault Detection in Leader-to-Follower Formations of Uncertain, Linearly Parameterized Systems
G07-127 Fuel-Optimal Spacecraft Rendezvous with Hybrid On-Off Continuous and Impulsive Thrust
G07-106 Relative Motion Control for Autonomous Rendezvous Based on Classical Orbital Element Differences
G07-103 Orbital Rendezvous: When is Autonomy Required?
G07-142 Motion Planning Under Uncertainty: Application to an Unmanned Helicopter
G07-192 Performance and Lyapunov Stability of a Nonlinear Path Following Guidance Method
G07-159 Relative Angles-Only Navigation and Pose Estimation For Autonomous Orbital Rendezvous

Control System Design

G07-175 Optimal Rotation Angle About a Nonnominal Euler Axis
G07-119 Nonlinear Synergetic Optimal Controllers
G07-166 Neural Optimal Magnetohydrodynamic Control of Hypersonic Flows
G07-116 Pseudospectral Feedback Control for Three-Axis Magnetic Attitude Stabilization in Elliptic Orbits
G07-196 Adaptive Control Design Methodology for Nonlinear-in-Control Systems in Aircraft Applications
G07-109 Total Energy Control System for Helicopter Flight/Propulsion Integrated Controller Design
G07-108 Flight Control System Architecture Optimization for Fly-By-Wire Airliners
G07-121 Active Control Schemes to Satisfy Separation Distance Constraints
G07-129 Approximate Minimum Energy Control Laws for Low-Thrust Formation Reconfiguration
G07-088 Feedback-Based Steering Law for Control Moment Gyros
G07-075 Retrofit Fault-Tolerant Flight Control Design Under Control Effector Damage
G07-006 Aircraft Autolander Safety Analysis Through Optimal Control-Based Reach Set Computation
G07-177 Separation Property for the Rigid-Body Attitude Tracking Control Problem
G07-197 Essentially Globally Asymptotically Stable Nutation Control Using a Single Reaction Wheel
G07-202 Design of Static $\mathbf{H}_\infty$ Linear Parameter Varying Controllers for Unmanned Aircraft
G07-112 Linear Parameter-Varying Antiwindup Compensation for Active Microgravity Vibration Isolation
G07-004 State-Dependent Riccati Equation Control For Small Autonomous Helicopters
G07-057 Modeling and Near-Space Stationkeeping Control of a Large High-Altitude Airship
G07-042 Nonlinear Model Reduction and Decentralized Control of Tethered Formation Flight
G07-031 Variable Structure Observer for Control Bias on Unmanned Air Vehicles
G07-005 Adaptive Deflection-Limiting Control for Slewing Flexible Space Structures
G07-161 High-α Flight Maneuverability Enhancement of a Fighter Aircraft Using Thrust-Vectoring Control
G07-099 Orbital Rendezvous and Flyaround Based on Null Controllability with Vanishing Energy
G07-111 Real-Time Nonlinear Embedded Control for an Autonomous Quadrotor Helicopter
G07-037 Stable Adaptation in the Presence of Actuator Constraints with Flight Control Applications
G07-058 Control of an Aeroelastic System with Actuator Saturation
G07-122 Robust Attitude Tracking Control of Spacecraft in the Presence of Disturbances
G07-074 Optimal Formation Reconfiguration of Multiple Spacecraft with Docking and Undocking Capability
G07-084 Adaptive Variable Structure and Commanding Shaped Vibration Control of Flexible Spacecraft
G07-029 Global Robust Control of an Aeroelastic System Using Output Feedback

Control System Effectors

G07-062 Aircraft Load Alleviation During Maneuvers Using Optimal Control Surface Combinations
G07-087 Adaptive Nonlinear Neural Controller for Aircraft Under Actuator Failures
G07-088 Feedback-Based Steering Law for Control Moment Gyros

Control System Sensors

G07-033 Scalable Sensing, Estimation, and Control Architecture for Large Spacecraft Formations

Control Theory

G07-037 Stable Adaptation in the Presence of Actuator Constraints with Flight Control Applications
G07-058 Control of an Aeroelastic System with Actuator Saturation
G07-025 Global Directional Control of a Slender Autonomous Underwater Vehicle
G07-150 Convex Programming Approach to Powered Descent Guidance for Mars Landing
G07-199 Near-Optimal Feedback Rendezvous in Elliptic Orbits Accounting for Nonlinear Differential Gravity
G07-005 Adaptive Deflection-Limiting Control for Slewing Flexible Space Structures
G07-075 Retrofit Fault-Tolerant Flight Control Design Under Control Effector Damage
G07-197 Essentially Globally Asymptotically Stable Nutation Control Using a Single Reaction Wheel
G07-177 Separation Property for the Rigid-Body Attitude Tracking Control Problem
G07-202 Design of Static $\mathbf{H}_\infty$ Linear Parameter Varying Controllers for Unmanned Aircraft
G07-170 Determining Strictly Positive Realness from System Modal Characteristics
G07-112 Linear Parameter-Varying Antiwindup Compensation for Active Microgravity Vibration Isolation
G07-089 Control-Oriented Modeling of an Air-Breathing Hypersonic Vehicle
G07-124 Stabilization of Angular Velocity of Asymmetrical Rigid Body Using Two Constant Torques
G07-036 Nonlinear Flight Control Design Using Constrained Adaptive Backstepping
G07-196 Adaptive Control Design Methodology for Nonlinear-in-Control Systems in Aircraft Applications
G07-143 Predictive Guidance for Pursuit-Evasion Engagements Involving Multiple Decoys
G07-119 Nonlinear Synergetic Optimal Controllers

Differential Games

G07-178 Homing Missile Guidance and Estimation Under Agile Target Acceleration

Dynamics

G07-107 Approximate Formulas for Time in Nearly Circular Orbits with Drag
G07-189 Modeling and Simulation of Airship Dynamics
G07-032 Corrigendum: New Form of Kane's Equations of Motion for Constrained Systems
G07-083 A Flight Simulation Algorithm for a Parafoil Suspending an Air Vehicle
G07-170 Determining Strictly Positive Realness from System Modal Characteristics
G07-162 Parameter-Free Second Order Numerical Scheme for Constrained Multibody Dynamical Systems
G07-172 Nonexplosive Approach to Fragment Subkilometer Asteroids with a Tether Centrifuge
G07-190 Analytical Charge Analysis for Two- and Three-Craft Coulomb Formations
G07-181 Axial Velocity Solution for Spinning-Up Rigid Bodies Subject to Constant Forces
G07-147 Separation Analysis Methodology for Designing Area Navigation Arrival Procedures
G07-104 Long-Lifetime Lunar Repeat Ground Track Orbits
G07-101 Relative Motion and the Geometry of Formations in Keplerian Elliptic Orbits with Arbitrary Eccentricity
G07-184 Periodic Solutions in the Planar (n+1) Ring Problem with Oblateness

Engine Control

G07-109 Total Energy Control System for Helicopter Flight/Propulsion Integrated Controller Design

Flight Mechanics

G07-125 Course and Heading Changes in Significant Wind
G07-176 Artificial Equilibrium Points in the Low-Thrust Restricted Three-Body Problem
G07-077 Prediction of Icing Effects on the Dynamic Response of Light Airplanes
G07-083 A Flight Simulation Algorithm for a Parafoil Suspending an Air Vehicle
G07-057 Modeling and Near-Space Stationkeeping Control of a Large High-Altitude Airship
G07-096 Design and Control of Libration Point Spacecraft Formations
G07-023 Two-Body Problem With High Tangential Speeds and Quadratic Drag

G07-173 Control and Simulation of Relative Motion for Aerial Refueling in Racetrack Maneuvers
G07-027 J_2 Effect in Cylindrical Coordinates
G07-118 Improved Endurance of Optimal Periodic Flight
G07-094 Unpowered Approach and Landing Guidance with Normal Acceleration Limitations
G07-015 Terminal Guidance for an Unpowered Reusable Launch Vehicle with Bank Constraints
G07-097 Satellite Constellations for Continuous and Early Warning Observation: A Correlation-Based Approach

Information Processing

G07-040 New Algorithms for Aircraft Intent Inference and Trajectory Prediction
G07-068 Multiple-Target Tracking and Identity Management with Application to Aircraft Tracking
G07-095 Huber-Based Divided Difference Filtering

Intelligent Control

G07-115 Adaptive Disturbance Rejection Controller for Visual Tracking of a Maneuvering Target
G07-196 Adaptive Control Design Methodology for Nonlinear-in-Control Systems in Aircraft Applications
G07-142 Motion Planning Under Uncertainty: Application to an Unmanned Helicopter
G07-179 Closed-Form Specified-Fuel Commands for Two Flexible Modes
G07-113 Adaptive Output Feedback Control of a Flexible Base Manipulator
G07-153 Adaptive, Integrated Guidance and Control Design for Line-of-Sight-Based Formation Flight
G07-037 Stable Adaptation in the Presence of Actuator Constraints with Flight Control Applications

Launch Vehicle Guidance and Control

G07-128 Launch Vehicle Autopilot Robustness to Multilinear Uncertainties: Analysis in Kharitonov Framework
G07-146 Predictor-Corrector Reentry Guidance Algorithm with Path Constraints for Atmospheric Entry Vehicles
G07-009 Model-Predictive Dynamic Control Allocation Scheme for Reentry Vehicles
G07-089 Control-Oriented Modeling of an Air-Breathing Hypersonic Vehicle
G07-198 Optimal Trajectory Reconfiguration and Retargeting for Reusable Launch Vehicles

Missile Guidance and Control

G07-123 Acceleration-Compensated Zero-Effort-Miss Guidance Law
G07-143 Predictive Guidance for Pursuit-Evasion Engagements Involving Multiple Decoys
G07-178 Homing Missile Guidance and Estimation Under Agile Target Acceleration
G07-157 Head Pursuit Guidance
G07-014 Integrated Estimation/Guidance Design Approach for Improved Homing Against Randomly Maneuvering Targets
G07-114 Integrated Sliding Mode Autopilot-Guidance for Dual-Control Missiles
G07-025 Global Directional Control of a Slender Autonomous Underwater Vehicle

Navigation

G07-016 Innovative Navigation Schemes for State and Parameter Estimation During Mars Entry
G07-012 Kalman Filtering for Relative Spacecraft Attitude and Position Estimation
G07-034 Differential Semimajor Axis Estimation Performance Using Carrier-Phase Differential Global Positioning System Measurements
G07-070 Solar-Sail Navigation: Estimation of Force, Moments, and Optical Parameters
G07-072 Autonomous Interplanetary Orbit Determination Using Satellite-to-Satellite Tracking
G07-038 Global Positioning System Integer Ambiguity Resolution Using Factorized Least-Squares Techniques
G07-010 Sensitivity-Analysis Method for Inverse Simulation Application
G07-183 Modeling, Analysis, and Simulation of GPS Carrier Phase for Spacecraft Relative Navigation
G07-187 Nonlinear Semi-Analytic Methods for Trajectory Estimation
G07-155 State Estimation for Autonomous Flight in Cluttered Environments
G07-137 Estimation of Relative Satellite Position Using Transformed Differential Carrier-Phase GPS Measurements
G07-159 Relative Angles-Only Navigation and Pose Estimation For Autonomous Orbital Rendezvous

Optimization Techniques

G07-131 Trim-Reference Functions for Indirect Method of Trajectory Optimization
G07-108 Flight Control System Architecture Optimization for Fly-By-Wire Airliners
G07-121 Active Control Schemes to Satisfy Separation Distance Constraints
G07-133 Flight Path Optimization at Constant Altitude
G07-164 Optimal Formation Design for Imaging and Fuel Usage
G07-163 Improved Edelbaum's Approach to Optimize Low Earth/Geostationary Orbits Low-Thrust Transfers
G07-119 Nonlinear Synergetic Optimal Controllers
G07-026 Computation of a Science Orbit About Europa
G07-017 Hybrid Approach to Optimize a Rendezvous Phasing Strategy
G07-200 Low-Thrust Interplanetary Transfers, Including Escape and Capture Trajectories
G07-009 Model-Predictive Dynamic Control Allocation Scheme for Reentry Vehicles
G07-046 Continuous Thrust Orbit Transfer Optimization Using Large-Scale Linear Programming
G07-043 Optimization of Interplanetary Trajectories for Impulsive and Continuous Asteroid Deflection
G07-041 Optimal Multi-Objective Linearized Impulsive Rendezvous
G07-138 Interior-Point Approach to Trajectory Optimization
G07-199 Near-Optimal Feedback Rendezvous in Elliptic Orbits Accounting for Nonlinear Differential Gravity
G07-105 Optimal Multi-Objective Nonlinear Impulsive Rendezvous
G07-097 Satellite Constellations for Continuous and Early Warning Observation: A Correlation-Based Approach
G07-033 Scalable Sensing, Estimation, and Control Architecture for Large Spacecraft Formations
G07-062 Aircraft Load Alleviation During Maneuvers Using Optimal Control Surface Combinations
G07-150 Convex Programming Approach to Powered Descent Guidance for Mars Landing
G07-100 Optimization of Multiple-Impulse, Multiple-Revolution, Rendezvous-Phasing Maneuvers

Pointing Systems

G07-116 Pseudospectral Feedback Control for Three-Axis Magnetic Attitude Stabilization in Elliptic Orbits
G07-148 Survey of Theory and Steering Laws of Single-Gimbal Control Moment Gyros

Redundancy Management

G07-009 Model-Predictive Dynamic Control Allocation Scheme for Reentry Vehicles

Robotics

G07-113 Adaptive Output Feedback Control of a Flexible Base Manipulator
G07-025 Global Directional Control of a Slender Autonomous Underwater Vehicle
G07-162 Parameter-Free Second Order Numerical Scheme for Constrained Multibody Dynamical Systems
G07-142 Motion Planning Under Uncertainty: Application to an Unmanned Helicopter

Signal Processing

G07-130 Comparing Antenna Conical Span Algorithms for Spacecraft Position Estimation
G07-095 Huber-Based Divided Difference Filtering
G07-007 Derivation and Simulation Testing of a Sigma-Points Smoother
G07-152 Fault Detection in Open-Loop Controlled Structures

Soft Computing

G07-100 Optimization of Multiple-Impulse, Multiple-Revolution, Rendezvous-Phasing Maneuvers

Spacecraft Dynamics

G07-074 Optimal Formation Reconfiguration of Multiple Spacecraft with Docking and Undocking Capability
G07-051 Designing Ephemeris Capture Trajectories at Europa Using Unstable Periodic Orbits
G07-090 Near Earth Object Orbit Modification Using Gravitational Coupling
G07-053 Electromagnetic Formation Flight Dynamics Including Reaction Wheel Gyroscopic Stiffening Effects
G07-084 Adaptive Variable Structure and Commanding Shaped Vibration Control of Flexible Spacecraft
G07-107 Approximate Formulas for Time in Nearly Circular Orbits with Drag
G07-171 Reachability and Optimal Phasing for Reconfiguration in Near-Circular Orbit Formations

G07-044 Classification of the Distant Stability Regions at Europa
G07-063 Boundedness of Spacecraft Hovering Under Dead-Band Control in Time-Invariant Systems
G07-120 Solar Sail Formation Flying Around Displaced Solar Orbits
G07-079 Nullcline Analysis as an Analytical Tethered Satellite Mission Design Tool
G07-022 Effect of Equinoctial Precession on Geosynchronous Earth Satellites
G07-091 Relative Spacecraft Motion in a Central Force Field
G07-056 Near-Optimal Very Low-Thrust Earth-Orbit Transfers and Guidance Schemes
G07-160 Long-Term Attitude Drift of Spinning Spacecraft Under Solar Radiation Torques
G07-047 Gauss's Variational Equation-Based Dynamics and Control for Formation Flying Spacecraft
G07-023 Two-Body Problem With High Tangential Speeds and Quadratic Drag
G07-018 Kepler's Problem in Rotating Reference Frames Part 1: Prime Integrals, Vectorial Regularization
G07-019 Kepler's Problem in Rotating Reference Frames Part 2: Relative Orbital Motion
G07-001 Survey of Nonlinear Attitude Estimation Methods
G07-055 Relative Motion Between Satellites on Neighboring Keplerian Orbits
G07-071 Solutions to the Variational Equations for Relative Motion of Satellites
G07-104 Long-Lifetime Lunar Repeat Ground Track Orbits
G07-101 Relative Motion and the Geometry of Formations in Keplerian Elliptic Orbits with Arbitrary Eccentricity
G07-102 High-Precision, Symplectic Numerical, Relative Orbit Propagation
G07-165 Analysis and Design for No-Spin Tethered Satellite Retrieval
G07-185 Linearized Dynamics of Formation Flying Spacecraft on a J_2-Perturbed Elliptical Orbit
G07-181 Axial Velocity Solution for Spinning-Up Rigid Bodies Subject to Constant Forces
G07-175 Optimal Rotation Angle About a Nonnominal Euler Axis
G07-167 Satellite Formation Design and Optimal Stationkeeping Considering Nonlinearity and Eccentricity
G07-188 New Synchronous Orbits Using the Geomagnetic Lorentz Force

Spacecraft Guidance and Control

G07-167 Satellite Formation Design and Optimal Stationkeeping Considering Nonlinearity and Eccentricity
G07-159 Relative Angles-Only Navigation and Pose Estimation For Autonomous Orbital Rendezvous
G07-127 Fuel-Optimal Spacecraft Rendezvous with Hybrid On-Off Continuous and Impulsive Thrust
G07-136 Guidance Strategy for Hyperbolic Rendezvous
G07-164 Optimal Formation Design for Imaging and Fuel Usage
G07-156 High-Altitude Satellite Relative Navigation Using Carrier-Phase Differential Global Positioning System Techniques
G07-185 Linearized Dynamics of Formation Flying Spacecraft on a J_2-Perturbed Elliptical Orbit
G07-165 Analysis and Design For No-Spin Tethered Satellite Retrieval
G07-116 Pseudospectral Feedback Control for Three-Axis Magnetic Attitude Stabilization in Elliptic Orbits
G07-103 Orbital Rendezvous: When Is Autonomy Required?
G07-106 Relative Motion Control for Autonomous Rendezvous Based on Classical Orbital Element Differences
G07-102 High-Precision, Symplectic Numerical, Relative Orbit Propagation
G07-148 Survey of Theory and Steering Laws of Single-Gimbal Control Moment Gyros
G07-193 Robust Spacecraft Angular Rate Estimation from Vector Observations Using Interlaced Particle Filtering
G07-071 Solutions to the Variational Equations for Relative Motion of Satellites
G07-124 Stabilization of Angular Velocity of Asymmetrical Rigid Body Using Two Constant Torques
G07-020 Cyclic Spacecraft Formations: Relative Motion Control Using Line-of-Sight Measurements Only
G07-042 Nonlinear Model Reduction and Decentralized Control of Tethered Formation Flight
G07-047 Gauss's Variational Equation-Based Dynamics and Control for Formation Flying Spacecraft
G07-096 Design and Control of Libration Point Spacecraft Formations
G07-056 Near-Optimal Very Low-Thrust Earth-Orbit Transfers and Guidance Schemes
G07-067 Formation Keeping and Attitude Alignment for Multiple Spacecraft Through Local Interactions
G07-069 Repeat-Groundtrack Orbit Acquisition and Maintenance for Earth-Observation Satellites
G07-088 Feedback-Based Steering Law for Control Moment Gyros
G07-018 Kepler's Problem in Rotating Reference Frames Part 1: Prime Integrals, Vectorial Regularization
G07-091 Relative Spacecraft Motion in a Central Force Field
G07-177 Separation Property for the Rigid-Body Attitude Tracking Control Problem
G07-197 Essentially Globally Asymptotically Stable Nutation Control Using a Single Reaction Wheel
G07-050 Feasible Trajectory Generation for Atmospheric Entry Guidance
G07-034 Differential Semimajor Axis Estimation Performance Using Carrier-Phase Differential Global Positioning System Measurements
G07-027 J_2 Effect in Cylindrical Coordinates
G07-063 Boundedness of Spacecraft Hovering Under Dead-Band Control in Time-Invariant Systems
G07-041 Optimal Multi-Objective Linearized Impulsive Rendezvous
G07-107 Approximate Formulas for Time in Nearly Circular Orbits with Drag
G07-105 Optimal Multi-Objective Nonlinear Impulsive Rendezvous
G07-099 Orbital Rendezvous and Flyaround Based on Null Controllability with Vanishing Energy
G07-030 Rigid Body Rate Inference from Attitude Variation
G07-048 Autonomous and Distributed Motion Planning for Satellite Swarm
G07-064 Further Results on the Controllability of a Two-Wheeled Satellite
G07-053 Electromagnetic Formation Flight Dynamics Including Reaction Wheel Gyroscopic Stiffening Effects
G07-033 Scalable Sensing, Estimation, and Control Architecture for Large Spacecraft Formations
G07-015 Terminal Guidance for an Unpowered Reusable Launch Vehicle with Bank Constraints

Chronological Index

G06-082TC Comment on "Precision Free-Inertial Navigation with Gravity Compensation by an Onboard Gradiometer." Thomas H. Kerr III, *TeK Associates* (**30**, 4, 1214-1215) Technical Comment

G06-082R Reply by the Author to T. H. Kerr. Chris Jekeli, *The Ohio State University* (**30**, 4, p. 1214) Reply

G07-001 Survey of Nonlinear Attitude Estimation Methods. John L. Crassidis, *University at Buffalo, State University of New York*; F. L. Markley, *NASA Goddard Space Flight Center*; and Yang Cheng, *University at Buffalo, State University of New York* (**30**, 1, p. 12) Survey Paper

G07-002 Hubble Space Telescope Angular Velocity Estimation During the Robotic Servicing Mission. Julie K. Thienel, *NASA Goddard Space Flight Center*; and Robert M. Sanner, *University of Maryland* (**30**, 1, p. 29) Article based on AIAA Paper 2005-6396

G07-003 Design and Evaluation of a Haptic Flight Director. S. de Stigter, M. Mulder, and M. M. Van Paassen, *Delft University of Technology, The Netherlands* (**30**, 1, p. 35) Article

G07-004 State-Dependent Riccati Equation Control for Small Autonomous Helicopters. Alexander Bogdanov, *Rockwell Scientific Company*; and Eric A. Wan, *Oregon Health & Science University* (**30**, 1, p. 47) Article

G07-005 Adaptive Deflection-Limiting Control for Slewing Flexible Space Structures. Hirohisa Kojima, *Tokyo Metropolitan University, Japan*; and William Singhose, *Georgia Institute of Technology* (**30**, 1, p. 61) Article

G07-006 Aircraft Autolander Safety Analysis Through Optimal Control-Based Reach Set Computation. Alexandre M. Bayen, *University of California at Berkeley*; Ian M. Mitchell, *University of British Columbia, Canada*; Meeko M. K. Oishi, *University of British Columbia*; and Claire J. Tomlin, *Stanford University* (**30**, 1, p. 68) Article

G07-007 Derivation and Simulation Testing of a Sigma-Points Smoother. Mark L. Psiaki, *Cornell University*; and Massaki Wada, *Saila System Inc., Japan* (**30**, 1, p. 78) Article based on AIAA Paper 2006-6349

G07-008 Minimum Angular-Impulse Control for a Large Flexible Spacecraft. E. M. Cliff and Terry L. Herdman, *Virginia Polytechnic Institute and State University*; and Z. Y. Liu, *University of Minnesota* (**30**, 1, p. 87) Article based on AIAA Paper 2006-1979

G07-009 Model-Predictive Dynamic Control Allocation Scheme for Reentry Vehicles. Yu Luo, Andrea Serrani, and Stephen Yurkovich, *The Ohio State University*; and Michael W. Oppenheimer and David B. Doman, *U.S. Air Force Research Laboratory* (**30**, 1, p. 100) Article

G07-010 Sensitivity-Analysis Method for Inverse Simulation Application. Linghai Lu, David J. Murray-Smith, and D. G. Thomson, *University of Glasgow, U.K.* (**30**, 1, p. 114) Article

G07-011 Optimal Cooperative Reconnaissance Using Multiple Vehicles. Jarurat Ousingsawat and Mark E. Campbell, *Cornell University* (**30**, 1, p. 122) Article based on AIAA Paper 2004-5224

G07-012 Kalman Filtering for Relative Spacecraft Attitude and Position Estimation. Son-Goo Kim, John L. Crassidis, Yang Cheng, and Adam M. Fosbury, *University at Buffalo, State University of New York*; and John L. Junkins, *Texas A&M University* (**30**, 1, p. 133) Article

G07-013 Automated Route Generation for Avoiding Deterministic Weather in Transition Airspace. Jimmy Krozel and Steve Penny, *Metron Aviation, Inc.*; Joseph Prete and Joseph S. B. Mitchell, *Stony Brook University* (**30**, 1, p. 144) Article based on AIAA Paper 2004-4790

G07-014 Integrated Estimation/Guidance Design Approach for Improved Homing Against Randomly Maneuvering Targets. Josef Shinar, Vladimir Turetsky, and Yaakov Oshman, *Technion—Israel Institute of Technology, Israel* (**30**, 1, p. 154) Article based on AIAA Paper 2004-4886

G07-015 Terminal Guidance for an Unpowered Reusable Launch Vehicle with Bank Constraints. C. A. Kluever, *University of Missouri—Columbia* (**30**, 1, p. 162) Article

G07-016 Innovative Navigation Schemes for State and Parameter Estimation During Mars Entry. Jean-Francois Lévesque, *Université de Sherbrooke, Canada*; and Jean de Lafontaine, *NGC Aerospace Ltd., Canada* (**30**, 1, p. 169) Article

G07-017 Hybrid Approach to Optimize a Rendezvous Phasing Strategy. Ya-Zhong Luo, Hai-yang Li, and Guo-Jin Tang, *National University of Defense Technology, China (ROC)* (**30**, 1, p. 185) Article

G07-018 Kepler's Problem in Rotating Reference Frames Part 1: Prime Integrals, Vectorial Regularization. Daniel Condurache and Vladimir Martinusi, *Technical University "Gheorghe Asachi," Romania* (**30**, 1, p. 192) Article

G07-019 Kepler's Problem in Rotating Reference Frames Part 2: Relative Orbital Motion. Daniel Condurache and Vladimir Martinusi, *Technical University "Gheorghe Asachi," Romania* (**30**, 1, p. 201) Article

G07-020 Cyclic Spacecraft Formations: Relative Motion Control Using Line-of-Sight Measurements Only. Pini Gurfil, *Technion—Israel Institute of Technology, Israel*; and David Mishne, *Rafael, Ltd., Israel* (**30**, 1, p. 214) Article

G07-021 Fuel Optimal Maneuvers for Multispacecraft Interferometric Imaging Systems. Suman Chakravorty and Jaime Ramirez, *Texas A&M University* (**30**, 1, p. 227) Article based on AIAA Paper 05-159

G07-022 Effect of Equinoctial Precession on Geosynchronous Earth Satellites. Pini Gurfil, *Technion—Israel Institute of Technology, Israel* (**30**, 1, p. 237) Article

G07-023 Two-Body Problem with High Tangential Speeds and Quadratic Drag. Mayer Humi, *Worcester Polytechnic Institute*; and Thomas Carter, *Eastern Connecticut State University* (**30**, 1, p. 248) Article based on AIAA Paper AAS-361

G07-024 Aircraft Landing Scheduling Optimization for Single Runway Noncontrolled Airports: Static Case. Yuanyuan Ding and John Valasek, *Texas A&M University* (**30**, 1, p. 252) Technical Note based on AIAA Paper 2004-5241

G07-025 Global Directional Control of a Slender Autonomous Underwater Vehicle. Hye-Young Kim, *Angstrom, Inc.*; and Craig A. Woolsey, *Virginia Polytechnic Institute & State University* (**30**, 1, p. 255) Technical Note

G07-026 Computation of a Science Orbit About Europa. Martin Lara, *Real Observatorio de la Armada, Spain*; and Ryan Russell, *Jet Propulsion Laboratory, California Institute of Technology* (**30**, 1, p. 259) Technical Note

G07-027 J_2 Effect in Cylindrical Coordinates. Mayer Humi, *Worcester Polytechnic Institute* (**30**, 1, p. 263) Technical Note

G07-028 Semi-Analytical Method for Calculating the Elliptic Restricted Three-Body Problem Monodromy Matrix. Pini Gurfil and Dani Meltzer, *Technion—Israel Institute of Technology, Israel* (**30**, 1, p. 266) Technical Note

G07-029 Global Robust Control of an Aeroelastic System Using Output Feedback. Keum W. Lee, *University of Kwandong*; and Sahjendra N. Singh, *University of Nevada Las Vegas* (**30**, 1, p. 271) Technical Note

G07-030 Rigid Body Rate Inference from Attitude Variation. Itzhack Y. Bar-Itzhack, *Technion—Israel Institute of Technology, Israel*; Richard R. Harman and Julie K. Thienel, *NASA Goddard Space Flight Center* (**30**, 1, p. 275) Technical Note

G07-031 Variable Structure Observer for Control Bias on Unmanned Air Vehicles. Nathan Slegers, *University of Alabama at Huntsville*; and Mark Costello, *Georgia Institute of Technology* (**30**, 1, p. 281) Technical Note

G07-032 Corrigendum: New Form of Kane's Equations of Motion for Constrained Systems. Carlos M. Roithmayr, *NASA Langley Research Center*; Abdulrahman H. Bajodah, *King Abdulaziz University, Saudi Arabia*; Dewey H. Hodges and Ye-Hwa Chen, *Georgia Institute of Technology* (**30**, 1, p. 286) Technical Note

G07-033 Scalable Sensing, Estimation, and Control Architecture for Large Spacecraft Formations. Terence H. McLoughlin and Mark Campbell, *Cornell University* (**30**, 2, p. 289) Article based on AIAA Paper 2004-5022

G07-034 Differential Semimajor Axis Estimation Performance Using Carrier-Phase Differential Global Positioning System Measurements. Jonathan P. How, Louis S. Breger, and Megan Mitchell, *Massachusetts Institute of Technology*; Kyle T. Alfriend, *Texas A&M University*; and Russell Carpenter, *NASA Goddard Space Flight Center* (**30**, 2, p. 301) Article based on AIAA Paper 2004-5024

G07-035 Angles-Only Orbit Updates for Low-Earth-Orbit Satellites. Chris Sabol, *U.S. Air Force Research Laboratory*; Kyle T. Alfriend, *Texas A&M University*; and David Wiese, *University of Colorado* (**30**, 2, p. 314) Article

G07-036 Nonlinear Flight Control Design Using Constrained Adaptive Backstepping. L. Sonneveldt, Q. P. Chu, and J. A. Mulder, *Delft University of Technology, The Netherlands* (**30**, 2, p. 322) Article based on AIAA Paper 2006-6413

G07-037 Stable Adaptation in the Presence of Actuator Constraints with Flight Control Applications. Eugene Lavretsky, *The Boeing Company*; and Naira Hovakimyan, *Virginia Polytechnic Institute and State University* (**30**, 2, p. 337) Article based on AIAA Paper 2006-6342

G07-038 Global Positioning System Integer Ambiguity Resolution Using Factorized Least-Squares Techniques. Mark L. Psiaki and Shan Mohiuddin, *Cornell University* (**30**, 2, p. 346) Article

G07-039 Probabilistic Human Pilot Approach: Application to Microburst Escape Maneuver. Atilla Dogan and Komkrit Kaewchay, *University of Texas at Arlington* (**30**, 2, p. 357) Article based on AIAA Paper 2005-6031

G07-040 New Algorithms for Aircraft Intent Inference and Trajectory Prediction. Javier Lovera Yepes, Inseok Hwang, and Mario Rotea, *Purdue University* (**30**, 2, p. 370) Article based on AIAA Paper 2005-5824

G07-041 Optimal Multi-Objective Linearized Impulsive Rendezvous. Ya-Zhong Luo, Guo-Jin Tang, and Yong-Jun Lei, *National University of Defense Technology, China (ROC)* (**30**, 2, p. 383) Article

G07-042 Nonlinear Model Reduction and Decentralized Control of Tethered Formation Flight. Soon-Jo Chung, Jean-Jacques E. Slotine, and David W. Miller, *Massachusetts Institute of Technology* (**30**, 2, p. 390) Article based on AIAA Paper 2006-6589

G07-043 Optimization of Interplanetary Trajectories for Impulsive and Continuous Asteroid Deflection. Dario Izzo, *ESA, The Netherlands* (**30**, 2, p. 401) Article

G07-044 Classification of the Distant Stability Regions at Europa. Martin Lara, *Real Observatorio de la Armada, Spain*; Ryan Russell and Benjamin F. Villac, *Jet Propulsion Laboratory, California Institute of Technology* (**30**, 2, p. 409) Article

G07-045 Trajectory Design with Hybrid Low-Thrust Propulsion System. Giovanni Mengali and Alessandro A. Quarta, *University of Pisa, Italy* (**30**, 2, p. 419) Article

G07-046 Continuous Thrust Orbit Transfer Optimization Using Large-Scale Linear Programming. Yuri Ulybyshev, *Rocket-Space Corporation "Energia," Russia* (**30**, 2, p. 427) Article

G07-047 Gauss's Variational Equation-Based Dynamics and Control for Formation Flying Spacecraft. Louis Breger and Jonathan P. How, *Massachusetts Institute of Technology* (**30**, 2, p. 437) Article

G07-048 Autonomous and Distributed Motion Planning for Satellite Swarm. Dario Izzo, *European Space Agency, The Netherlands*; and Lorenzo Pettazzi, *University of Bremen, Germany* (**30**, 2, p. 449) Article

G07-049 Primer Vector Theory Applied to Global Low-Thrust Trade Studies. Ryan P. Russell, *Jet Propulsion Laboratory, California Institute of Technology* (**30**, 2, p. 460) Article

G07-050 Feasible Trajectory Generation for Atmospheric Entry Guidance. James A. Leavitt and Kenneth D. Mease, *University of California, Irvine* (**30**, 2, p. 473) Article

G07-051 Designing Ephemeris Capture Trajectories at Europa Using Unstable Periodic Orbits. Ryan P. Russell and Try Lam, *Jet Propulsion Laboratory, California Institute of Technology* (**30**, 2, p. 482) Article

G07-052 Space Vehicle Conflict-Avoidance Analysis. Russell P. Patera, *The Aerospace Corporation* (**30**, 2, p. 492) Article based on AIAA Paper 2006-235

G07-053 Electromagnetic Formation Flight Dynamics Including Reaction Wheel Gyroscopic Stiffening Effects. Laila M. Elias, Daniel W. Kwon, Raymond J. Sedwick, and David W. Miller, *Massachusetts Institute of Technology* (**30**, 2, p. 499) Article

G07-054 Refined Solar Sail Force Model with Mission Application. Giovanni Mengali and Alessandro A. Quarta, *University of Pisa, Italy*; Christian Circi, *Scuola di Ingegneria Aerospaziale, Italy*; and Bernd Dachwald, *DLR, German Aerospace Center, Germany* (**30**, 2, p. 512) Article

G07-055 Relative Motion Between Satellites on Neighboring Keplerian Orbits. Philip L. Palmer and Egemen Imre, *University of Surrey, U.K.* (**30**, 2, p. 521) Article

G07-056 Near-Optimal Very Low-Thrust Earth-Orbit Transfers and Guidance Schemes. Yang Gao, *Chinese Academy of Sciences, China (ROC)* (**30**, 2, p. 529) Article

G07-057 Modeling and Near-Space Stationkeeping Control of a Large High-Altitude Airship. David K. Schmidt, *University of Colorado* (**30**, 2, p. 540) Article based on AIAA Paper 2006-6781

G07-058 Control of an Aeroelastic System with Actuator Saturation. Ellen Applebaum and Joseph Ben-Asher, *Technion—Israel Institute of Technology, Israel* (**30**, 2, p. 548) Article

G07-059 Nonlinear Black-Box Modeling of Aeroelastic Systems Using Structure Detection Approach: Application to F/A-18 Data. Sunil L. Kukreja and Martin J. Brenner, *NASA Dryden Flight Research Center* (**30**, 2, p. 557) Article

G07-060 Semi-Active Linear Stroke Magnetorheological Fluid-Elastic Helicopter Lag Damper. Wei Hu and Norman M. Wereley, *University of Maryland*; Louis Chemouni, *Barry Controls, Inc.*; and Peter C. Chen, *Techno-Sciences, Inc.* (**30**, 2, p. 565) Article

G07-061 Enhanced Self-Spacing Algorithm for Three-Degree Decelerating Approaches. J. L. De Prins, F.K.M Schippers, M. Mulder, M. M. van Paassen, and A. C. in 't Veld, *Delft University of Technology, The Netherlands*; and J.-P. Clarke, *Georgia Institute of Technology* (**30**, 2, p. 576) Article based on AIAA Paper 2005-6139

G07-062 Aircraft Load Alleviation During Maneuvers Using Optimal Control Surface Combinations. Sebastian L. Gaulocher and Clément Roos, *SUPAERO, France*; and Christelle Cumer, *ONERA, France* (**30**, 2, p. 591) Article

G07-063 Boundedness of Spacecraft Hovering Under Dead-Band Control in Time-Invariant Systems. Stephen B. Broschart and Daniel J. Scheeres, *University of Michigan* (**30**, 2, p. 601) Article based on AIAA Paper 2005-381

G07-064 Further Results on the Controllability of a Two-Wheeled Satellite. Frédéric Boyer, *Ecole de Mines de Nantes, France*; and Mazen Alamir, *Laboratoire d'Automatique de Grenoble, France* (**30**, 2, p. 611) Article

G07-065 Cable Control of an Aerostat Platform: Experimental Results and Model Validation. Casey Lambert and Meyer Nahon, *McGill University, Canada*; Dean Chalmers, *Dominion Radio Astrophysical Observatory, Canada*; and Gabriele Gilardi, *University of Victoria, Canada* (**30**, 2, p. 620) Article

G07-066 Optimal Path Planning with a Kinematic Airplane Model. Timothy G. McGee, *Johns Hopkins University Applied Physics Laboratory*; and J. Karl Hedrick, *University of California, Berkeley* (**30**, 2, p. 629) Technical Note based on AIAA Paper 2005-6186

G07-067 Formation Keeping and Attitude Alignment for Multiple Spacecraft Through Local Interactions. Wei Ren, *Utah State University* (**30**, 2, p. 633) Technical Note

G07-068 Multiple-Target Tracking and Identity Management with Application to Aircraft Tracking. Inseok Hwang, *Purdue University*; Hamsa Balakrishnan, Kaushik Roy, and Claire Tomlin, *Stanford University* (**30**, 3, p. 641) Article

G07-069 Repeat-Groundtrack Orbit Acquisition and Maintenance for Earth-Observation Satellites. M. Aorpimai, *Mahanakorn University of Technology, Thailand*; and P. L. Palmer, *University of Surrey, U.K.* (**30**, 3, p. 654) Article based on AIAA Paper 04-111

G07-070 Solar-Sail Navigation: Estimation of Force, Moments, and Optical Parameters. L. Rios-Reyes and D. J. Scheeres, *University of Michigan* (**30**, 3, p. 660) Article based on AIAA Paper AAS0-6225

G07-071 Solutions to the Variational Equations for Relative Motion of Satellites. Daero Lee, J. E. Cochran, and J. H. Jo, *Auburn University* (**30**, 3, p. 669) Article based on AIAA Paper 05-294

G07-072 Autonomous Interplanetary Orbit Determination Using Satellite-to-Satellite Tracking. Keric Hill and George Born, *University of Colorado* (**30**, 3, p. 679) Article

G07-073 Periodic Orbits Above the Ecliptic in the Solar-Sail Restricted Three-Body Problem. Thomas J. Waters and Colin R. McInnes, *University of Strathclyde, U.K.* (**30**, 3, p. 687) Article

G07-074 Optimal Formation Reconfiguration of Multiple Spacecraft with Docking and Undocking Capability. C. Y. Xia and P. K. C. Wang, *University of California, Los Angeles*; and F. Y. Hadaegh, *Jet Propulsion Laboratory, California Institute of Technology* (**30**, 3, p. 694) Article based on AIAA Paper 2005-6460

G07-075 Retrofit Fault-Tolerant Flight Control Design Under Control Effector Damage. Jovan D. Boskovic, Ravi Prasanth, and Raman K. Mehra, *Scientific Systems Company, Inc.* (**30**, 3, p. 703) Article based on AIAA Paper 2005-6374

G07-076 Stability and Control of a High-Altitude, Long-Endurance UAV. Ilhan Tuzcu, *University of Alabama*; Pier Marzocca, *Clarkson University*; Enrico Cestino, Giulio Romeo, and Giacomo Frulla, *Politecnico di Torino, Italy* (**30**, 3, p. 713) Article based on AIAA Paper 2006-1641

G07-077 Prediction of Icing Effects on the Dynamic Response of Light Airplanes. Amanda Lampton and John Valasek, *Texas A&M University* (**30**, 3, p. 722) Article based on AIAA Paper 2005-6219

G07-078 Active Control and Closed-Loop Identification of Flutter Instability in Typical Section Airfoil. MarkA. McEver, *L-3 Communications Corporation*; Emil V. Ardelean, *Science Applications International Corporation*; Daniel G. Cole, *University of Pittsburgh*; and Robert L. Clark, *Duke University* (**30**, 3, p. 733) Article based on AIAA Paper 2004-1973

G07-079 Nullcline Analysis as an Analytical Tethered Satellite Mission Design Tool. David A. Padgett and Andre P. Mazzoleni, *North Carolina State University* (**30**, 3, p. 741) Article

G07-080 Dynamics of Circularly Towed Aerial Cable Systems, Part 1: Optimal Configurations and Their Stability. Paul Williams and Pavel Trivailo, *RMIT University, Australia* (**30**, 3, p. 753) Article based on AIAA Paper 2005-6124

G07-081 Dynamics of Circularly Towed Aerial Cable Systems, Part 2: Transitional Flight and Deployment Control. Paul Williams and Pavel Trivailo, *RMIT University, Australia* (**30**, 3, p. 766) Article based on AIAA Paper 2005-6125

G07-082 Recursive Algorithm with Efficient Variables for Flexible Multibody Dynamics with Multiloop Constraints. Arun K. Banerjee and Mark E. Lemak, *Lockheed Martin Advanced Technology Center* (**30**, 3, p. 780) Article

G07-083 A Flight Simulation Algorithm for a Parafoil Suspending an Air Vehicle. Christiaan Redelinghuys, *University of Cape Town, South Africa* (**30**, 3, p. 791) Article

G07-084 Adaptive Variable Structure and Commanding Shaped Vibration Control of Flexible Spacecraft. Quinglei Hu, *Harbin Institute of Technology, China (ROC)*; Peng Shi, *University of Glamorgan, U.K.*; and Huijun Gao, *University of Alberta, Canada* (**30**, 3, p. 804) Article

G07-085 Vision-Based State Estimation for Autonomous Micro Air Vehicles. Thomas P. Webb and Richard J. Prazenica, *University of Florida*; Andrew J. Kurdila, *Virginia Polytechnic Institute and State University*; and Rick Lind, *University of Florida* (**30**, 3, p. 816) Article based on AIAA Paper 2004-5349

G07-086 Flight Dynamics and Control Authority of Flap-Controlled Open Boxes. Eric Beyer, *Oregon State University*; and Mark Costello, *Georgia Institute of Technology* (**30**, 3, p. 827) Article based on AIAA Paper 2005-6326

G07-087 Adaptive Nonlinear Neural Controller for Aircraft Under Actuator Failures. A. A. Pashilkar, *National Aerospace Laboratories, India*; N. Sundararajan and P. Saratchandran, *Nanyang Technological University, Singapore* (**30**, 3, p. 835) Article

G07-088 Feedback-Based Steering Law for Control Moment Gyros. Alexandre N. Pechev, *Surrey Space Centre, University of Surrey, U.K.* (**30**, 3, p. 848) Article

G07-089 Control-Oriented Modeling of an Air-Breathing Hypersonic Vehicle. Jason T. Parker, *U.S. Air Force Research Laboratory*; Andrea Serrani and Stephen Yurkovich, *The Ohio State University*; Michael A. Bolender and David B. Doman, *U.S. Air Force Research Laboratory* (**30**, 3, p. 856) Article based on AIAA Paper 2006-6556

G07-090 Near Earth Object Orbit Modification Using Gravitational Coupling. Colin R. McInnes, *University of Strathclyde, U.K.* (**30**, 3, p. 870) Technical Note

G07-091 Relative Spacecraft Motion in a Central Force Field. Daniel Condurache and Vladimir Martinusi, *Technical University "Gheorghe Asachi," Romania* (**30**, 3, p. 873) Technical Note

G07-092 Optimal Steering Law for the GeoSail Mission. Giovanni Mengali and Alessandro A. Quarta, *University of Pisa, Italy*; and Vaios J. Lappas, *University of Surrey, U.K.* (**30**, 3, p. 876) Technical Note

G07-093 Active Flutter Suppression by Feedback Compensation of Transport Logs. Ranjan Vepa, *University of London, U.K.* (**30**, 3, p. 879) Technical Note

G07-094 Unpowered Approach and Landing Guidance with Normal Acceleration Limitations. C. A. Kluever, *University of Missouri—Columbia* (**30**, 3, p. 882) Technical Note

G07-095 Huber-Based Divided Difference Filtering. Christopher D. Karlgaard, *Analytical Mechanics Associates, Inc.*; and Hanspeter Schaub, *Virginia Polytechnic Institute and State University* (**30**, 3, p. 885) Technical Note based on AIAA Paper 2006-6243

G07-096 Design and Control of Libration Point Spacecraft Formations. Samantha I. Infeld, *Stanford University*; Scott B. Josselyn, *Naval Postgraduate School*; Walter Murray, *Stanford University*; and I. Michael Ross, *Naval Postgraduate School* (**30**, 4, p. 899) Article based on AIAA Paper 2004-4786

G07-097 Satellite Constellations for Continuous and Early Warning Observation: A Correlation-Based Approach. Mauro Pontani and Paolo Teofilatto, *University of Rome "La Sapienza," Italy* (**30**, 4, p. 910) Article

G07-098 Low-Thrust, High-Accuracy Trajectory Optimization. I. Michael Ross, Qi Gong, and Pooya Sekhavat, *Naval Postgraduate School* (**30**, 4, p. 921) Article

G07-099 Orbital Rendezvous and Flyaround Based on Null Controllability with Vanishing Energy. Motoyuki Shibata and Akira Ichikawa, *Kyoto University, Japan* (**30**, 4, p. 934) Article

G07-100 Optimization of Multiple-Impulse, Multiple-Revolution, Rendezvous-Phasing Maneuvers. Ya-zhong Luo, Guo-Jin Tang, Yong-Jun Li, and Hai-Yang Li, *National University of Defense Technology, China (ROC)* (**30**, 4, p. 946) Article

G07-101 Relative Motion and the Geometry of Formations in Keplerian Elliptic Orbits with Arbitrary Eccentricity. Prasenjit Sengupta and Srinivas R. Vadali, *Texas A&M University* (**30**, 4, p. 953) Article

G07-102 High-Precision, Symplectic Numerical, Relative Orbit Propagation. E. Imre and P. L. Palmer, *Surrey Space Centre, U.K.* (**30**, 4, p. 965) Article

G07-103 Orbital Rendezvous: When is Autonomy Required? David Geller, *Utah State University* (**30**, 4, p. 974) Article based on AIAA Paper 2006-6298

G07-104 Long-Lifetime Lunar Repeat Ground Track Orbits. Ryan P. Russell, *Jet Propulsion Laboratory, California Institute of Technology*; and Martin Lara, *Real Observatorio de la Armada, Spain* (**30**, 4, p. 982) Article based on AIAA Paper 2006-6750

G07-105 Optimal Multi-Objective Nonlinear Impulsive Rendezvous. Ya-Zhong Luo, Yong-Jun Lei, and Guo-Jin Tang, *National University of Defense Technology, China (ROC)* (**30**, 4, p. 994) Article

G07-106 Relative Motion Control for Autonomous Rendezvous Based on Classical Orbital Element Differences. Tong Chen and Shijie Xu, *Beihang University, China (ROC)*; and Songxia Wang, *University of Nottingham, U.K.* (**30**, 4, p. 1003) Article

G07-107 Approximate Formulas for Time in Nearly Circular Orbits with Drag. Mayer Humi, *Worcester Polytechnic Institute*; and Thomas Carter, *Eastern Connecticut State University* (**30**, 4, p. 1015) Article

G07-108 Flight-Control System Architecture Optimization for Fly-By-Wire Airliners. Christophe Bauer and Kristen Lagadec, *Airbus France, France*; Christian Bès and Marcel Mongeau, *Universite de Toulouse, France* (**30**, 4, p. 1023) Article

G07-109 Total Energy Control System for Helicopter Flight/Propulsion Integrated Controller Design. Sheng-Wen Chen, *National Cheng Kung University, Taiwan (ROC)*; Pang-Chia Chen, *Kao Yuan University, Taiwan (ROC)*; Ciann-Dong Yang, *National Cheng Kung University, Taiwan (ROC)*; and Yaug-Fea Jeng, *Chienkuo Technology University, Taiwan (ROC)* (**30**, 4, p. 1030) Article

G07-110 Multi-Input/Multi-Output Adaptive Output Feedback Control Design for Aeroelastic Vibration Suppression. K. K. Reddy, *University of Central Florida*; J. Chen, *University of Michigan*; Aman Behal, *University of Central Florida*; and Pier Marzocca, *Clarkson University* (**30**, 4, p. 1040) Article

G07-111 Real-Time Nonlinear Embedded Control for an Autonomous Quadrotor Helicopter. F. Kendoul, D. Lara, I. Fantoni, and R. Lozano, *Université de Technologie de Compiègne, France* (**30**, 4, p. 1049) Article

G07-112 Linear Parameter-Varying Antiwindup Compensation for Active Microgravity Vibration Isolation. Feng Zhang, Karolos M. Grigoriadis, and Ian J. Fialho, *University of Houston* (**30**, 4, p. 1062) Article

G07-113 Adaptive Output Feedback Control of a Flexible Base Manipulator. Bong-Jun Yang, Anthony J. Calise, and James I. Craig, *Georgia Institute of Technology* (**30**, 4, p. 1068) Article based on AIAA Paper 2004-5322

G07-114 Integrated Sliding Mode Autopilot-Guidance for Dual-Control Missiles. Moshe Idan and Tal Shima, *Technion—Israel Institute of Technology, Israel*; and Oded M. Golan, *RAFAEL, Ministry of Defense, Israel* (**30**, 4, p. 1081) Article based on AIAA Paper 2005-6455

G07-115 Adaptive Disturbance Rejection Controller for Visual Tracking of a Maneuvering Target. Vahram Stepanyan and Naira Hovakimyan, *Virginia Polytechnic Institute and State University* (**30**, 4, p. 1090) Article based on AIAA Paper 2005-6000

G07-116 Pseudospectral Feedback Control for Three-Axis Magnetic Attitude Stabilization in Elliptic Orbits. Hui Yan, *Texas A&M University*; I. Michael Ross, *Naval Postgraduate School*; and Kyle T. Alfriend, *Texas A&M University* (**30**, 4, p. 1107) Article

G07-117 Use of Least Means Squares Filter in Control of Optical Beam Jitter. R. J. Watkins, *U.S. Naval Academy*; and Brij N. Agrawal, *Naval Postgraduate School* (**30**, 4, p. 1116) Article

G07-118 Improved Endurance of Optimal Periodic Flight. Robert H. Chen and Jason L. Speyer, *SySense Inc.* (**30**, 4, p. 1123) Article based on AIAA Paper 2006-6545

G07-119 Nonlinear Synergetic Optimal Controllers. Antonius Nusawardhana, S. H. Zak, and W. A. Crossley, *Purdue University* (**30**, 4, p. 1134) Article

G07-120 Solar Sail Formation Flying Around Displaced Solar Orbits. Shengping Gong, Hexi Baoyin, and Junfeng Li, *Tsinghua University, China (ROC)* (**30**, 4, p. 1148) Technical Note

G07-121 Active Control Schemes to Satisfy Separation Distance Constraints. Pedro A. Capó-Lugo and Peter M. Bainum, *Howard University* (**30**, 4, p. 1152) Technical Note

G07-122 Robust Attitude Tracking Control of Spacecraft in the Presence of Disturbances. Zheng-Xue Li and Ben-Li Wang, *Harbin Institute of Technology, China (ROC)* (**30**, 4, p. 1156) Technical Note

G07-123 Acceleration-Compensated Zero-Effort-Miss Guidance Law. Vincent C. Lam, *Lockheed Martin Corporation* (**30**, 4, p. 1159) Technical Note based on AIAA Paper 2006-6083

G07-124 Stabilization of Angular Velocity of Asymmetrical Rigid Body Using Two Constant Torques. Hirohisa Kojima, *Tokyo Metropolitan University, Japan* (**30**, 4, p. 1163) Technical Note

G07-125 Course and Heading Changes in Significant Wind. Rolf Rysdyk, *University of Washington* (**30**, 4, p. 1168) Technical Note

G07-126 Loxodromic Descent: A New Regularized Rotation Estimation. Luc Fraiture, *Germany* (**30**, 4, p. 1171) Technical Note

G07-127 Fuel-Optimal Spacecraft Rendezvous with Hybrid On-Off Continuous and Impulsive Thrust. Riccardo Bevilacqua, *University of Rome "La Sapienza," Italy*; and Marcello Romano, *U.S. Naval Postgraduate School* (**30**, 4, p. 1175) Technical Note

G07-128 Launch Vehicle Autopilot Robustness to Multilinear Uncertainties: Analysis in Kharitonov Framework. V. R. Lalithambika, *Vikram Sarabhai Space Center, India*; and S. Dasgupta, *Mohandas College of Engineering and Technology, India* (**30**, 4, p. 1179) Technical Note

G07-129 Approximate Minimum Energy Control Laws for Low-Thrust Formation Reconfiguration. Hui Yan and Kyle T. Alfriend, *Texas A&M University* (**30**, 4, p. 1182) Technical Note

G07-130 Comparing Antenna Conical Span Algorithms for Spacecraft Position Estimation. Lingji Chen, *Scientific Systems Company Inc.*; Nanaz Fathpour, *Jet Propulsion Laboratory, California Institute of Technology*; and Raman K. Mehra, *Scientific Systems Company Inc.* (**30**, 4, p. 1186) Technical Note

G07-131 Trim-Reference Functions for Indirect Method of Trajectory Optimization. Roger L. Barron and Cleon M. Chick (**30**, 4, p. 1189) Technical Note

G07-132 Averaging Quaternions. F. Landis Markley, *NASA Goddard Space Flight Center*; Yang Cheng and John L. Crassidis, *University at Buffalo, State University of New York*; and Yaakov Oshman, *Technion—Israel Institute of Technology, Israel* (**30**, 4, p. 1193) Technical Note

G07-133 Flight Path Optimization at Constant Altitude. Douglas M. Pargett, *NASA Ames Research Center*; and Mark D. Ardema, *Santa Clara University* (**30**, 4, p. 1197) Technical Note

G07-134 Three-Dimensional Aircraft Terrain-Following via Real-Time Optimal Control. Paul Williams, *Royal Melbourne Institute of Technology University, Australia* (**30**, 4, p. 1201) Technical Note

G07-135 Model Updating with Closed-Loop Strain Mode Shapes. Jaehoon Ha, Youngjin Park, and Younsik Park, *Korea Advanced Institute of Science and Technology, Republic of Korea* (**30**, 4, p. 1206) Technical Note

G07-136 Guidance Strategy for Hyperbolic Rendezvous. Damon F. Landau and James M. Longuski, *Purdue University* (**30**, 4, p. 1209) Technical Note based on AIAA Paper 2006-6299

G07-137 Estimation of Relative Satellite Position Using Transformed Differential Carrier-Phase GPS Measurements. Jonathan D. Wolfe, Jason L. Speyer, and Soonsik Hwang, *University of California, Los Angeles*; Young-Jae Lee and Eunsung Lee, *Konkuk University School of Engineering, Republic of Korea* (**30**, 5, p. 1217) Article based on AIAA Paper 2004-4777

G07-138 Interior-Point Approach to Trajectory Optimization. Julien Laurent-Varin and Frédéric Bonnans, *INRIA, France*; Nicolas Bérend, *ONERA, France*; Mounir Haddou, *Université d'Orléans, France*; and Christophe Talbot, *Centre National d'Etudes Spatiales, France* (**30**, 5, p. 1228) Article

G07-139 Optimal Control of Sensor Threshold for Autonomous Wide-Area-Search Munitions. Brian A. Kish, David R. Jacques, and Meir Pachter, *U.S. Air Force Institute of Technology* (**30**, 5, p. 1239) Article based on AIAA Paper 2005-6190

G07-140 Discrete-Time, Closed-Loop Aeromechanical Stability Analysis of Helicopters with Higher Harmonic Control. Marco Lovera and Patrizio Colaneri, *Politecnico di Milano, Italy*; Carlos Malpica and Roberto Celi, *University of Maryland* (**30**, 5, p. 1249) Article

G07-141 Transfer to Distant Retrograde Orbits Using Manifold Theory. Jacob Demeyer, *Delft University of Technology, The Netherlands*; and Pini Gurfil, *Technion—Israel Institute of Technology, Israel* (**30**, 5, p. 1261) Article

G07-142 Motion Planning Under Uncertainty: Application to an Unmanned Helicopter. Joshua D. Davis and Suman Chakravorty, *Texas A&M University* (**30**, 5, p. 1268) Article

G07-143 Predictive Guidance for Pursuit-Evasion Engagements Involving Multiple Decoys. D. Dionne, *Lockheed Martin Canada, Canada*; H. Michalska, *McGill University, Canada*; and C. A. Rabbath, *Defence Research and Development Canada-Valcartier, Canada* (**30**, 5, p. 1277) Article

G07-144 Near-Optimal Missile Avoidance Trajectories via Receding Horizon Control. Janne Karelahti, Kai Virtanen, and Tuomas Raivio, *Helsinki University of Technology, Finland* (**30**, 5, p. 1287) Article based on AIAA Paper 2006-6312

G07-145 Tour Planning for an Unmanned Air Vehicle Under Wind Conditions. Rachelle L. McNeely and Ram V. Iyer, *Texas Tech University*; and Phillip R. Chandler, *U.S. Air Force Research Laboratory* (**30**, 5, p. 1299) Article

G07-146 Predictor-Corrector Reentry Guidance Algorithm with Path Constraints for Atmospheric Entry Vehicles. Ashok Joshi and K. Sivan, *Indian Institute of Technology Bombay, India*; and S. Savithri Amma, *Vikram Sarabhai Space Center, India* (**30**, 5, p. 1307) Article based on AIAA Paper 2005-6438

G07-147 Separation Analysis Methodology for Designing Area Navigation Arrival Procedures. Liling Ren and John-Paul B. Clarke, *Georgia Institute of Technology* (**30**, 5, p. 1319) Article

G07-148 Survey of Theory and Steering Laws of Single-Gimbal Control Moment Gyros. Haruhisa Kurokawa, *National Institute of Advanced Industrial Science and Technology, Japan* (**30**, 5, p. 1331) Article

G07-149 Three-Dimensional Ascent Trajectory Optimization for Stratospheric Airship Platform in the Jet Stream. Sangjong Lee, *Korea Aerospace Research Institute, Republic of Korea*; and Hyochoong Bang, *Korea Advanced Institute of Science and Technology, Republic of Korea* (**30**, 5, p. 1341) Article

G07-150 Convex Programming Approach to Powered Descent Guidance for Mars Landing. Behçet Açikmese and Scott R. Ploen, *Jet Propulsion Laboratory, California Institute of Technology* (**30**, 5, p. 1353) Article based on AIAA Paper 2005-6288

G07-151 High-Order Quasi-Linearization Technique for Identification of Linear-Fractional-Transformation-Modeled Aeroservoelastic Systems. Boris Moulin, *Technion—Israel Institute of Technology, Israel* (**30**, 5, p. 1367) Article based on AIAA Paper 2006-2034

G07-152 Fault Detection in Open-Loop Controlled Structures. Shanshan S. McNeill and David C. Zimmerman, *University of Houston* (**30**, 5, p. 1378) Article

G07-153 Adaptive, Integrated Guidance and Control Design for Line-of-Sight-Based Formation Flight. Byoung Soo Kim, *Gyeongsang National University, Republic of Korea*; Anthony J. Calise and Ramachandra Sattigeri, *Georgia Institute of Technology* (**30**, 5, p. 1386) Article based on AIAA Paper 2006-6716

G07-154 Digital Autoland Control Laws Using Quantitative Feedback Theory and Direct Digital Design. Thomas Wagner and John Valasek, *Texas A&M University* (**30**, 5, p. 1399) Article based on AIAA Paper 2006-6599

G07-155 State Estimation for Autonomous Flight in Cluttered Environments. Jack W. Langelaan, *The Pennsylvania State University* (**30**, 5, p. 1414) Article based on AIAA Paper 2004-5140

G07-156 High-Altitude Satellite Relative Navigation Using Carrier-Phase Differential Global Positioning System Techniques. Shan Mohiuddin and Mark L. Psiaki, *Cornell University* (**30**, 5, p. 1427) Article based on AIAA Paper 2005-6054

G07-157 Head Pursuit Guidance. Tal Shima, *Technion—Israel Institute of Technology, Israel*; and Oded M. Golan, *RAFAEL, Israel* (**30**, 5, p. 1437) Article

G07-158 Models for the Comet Dynamical Environment. Sharyl M. Byram, Daniel J. Scheeres, and Michael R. Combi, *University of Michigan* (**30**, 5, p. 1445) Article based on AIAA Paper 2006-6288

G07-159 Relative Angles-Only Navigation and Pose Estimation For Autonomous Orbital Rendezvous. David C. Woffinden and David K. Geller, *Utah State University* (**30**, 5, p. 1455) Article based on AIAA Paper 2006-6300

G07-160 Long-Term Attitude Drift of Spinning Spacecraft Under Solar Radiation Torques. Jozef C. van der Ha, *Kyushu University, Japan*; and Vaios J. Lappas, *Surrey Space Centre, England, U.K.* (**30**, 5, p. 1470) Article based on AIAA Paper AAS -415

G07-161 High-α Flight Maneuverability Enhancement of a Fighter Aircraft Using Thrust-Vectoring Control. Özgür Atesoglu, *ASELSAN Inc., Turkey*; and M. Kemal Özgören, *Middle East Technical University, Turkey* (**30**, 5, p. 1480) Article based on AIAA Paper 2006-6056

G07-162 Parameter-Free Second Order Numerical Scheme for Constrained Multibody Dynamical Systems. Samuel W. J. Welch, *University of Colorado at Denver and Health Sciences Center*; Min Hong, *Soonchunhyang University, Republic of Korea*; John A. Trapp and Min-Hyung Choi, *University of Colorado at Denver and Health Sciences Center* (**30**, 5, p. 1494) Article

G07-163 Improved Edelbaum's Approach to Optimize Low Earth/Geostationary Orbits Low-Thrust Transfers. Lorenzo Casalino and Guido Colasurdo, *Politecnico di Torino, Italy* (**30**, 5, p. 1504) Article based on AIAA Paper 2004-5402

G07-164 Optimal Formation Design for Imaging and Fuel Usage. Islam I. Hussein, *Worcester Polytechnic Institute*; Daniel J. Scheeres, *University of Michigan*; and David C. Hyland, *Texas A&M University* (**30**, 5, p. 1511) Technical Note based on AIAA Paper 05-160

G07-165 Analysis and Design For No-Spin Tethered Satellite Retrieval. David A. Padgett and Andre P. Mazzoleni, *North Carolina State University* (**30**, 5, p. 1516) Technical Note

G07-166 Neural Optimal Magnetohydrodynamic Control of Hypersonic Flows. Nilesh V. Kulkarni, *Perot Systems, Inc.*; and Minh Q. Phan, *Dartmouth College* (**30**, 5, p. 1519) Technical Note based on AIAA Paper 2003-5497

G07-167 Satellite Formation Design and Optimal Stationkeeping Considering Nonlinearity and Eccentricity. Jian-jun Xing, Guo-jin Tang, Xiao-ning Xi, and Hai yang Li, *National University of Defense Technology, China (ROC)* (**30**, 5, p. 1523) Technical Note

G07-168 Robust Decentralized Fault Detection in Leader-to-Follower Formations of Uncertain Linearly Parameterized Systems. Nicolas Léchevin and Camille Alain Rabbath, *Defence Research and Development Canada-Valcartier, Canada* (**30**, 5, p. 1528) Technical Note

G07-169 Active Suppression of Flutter with a Smart Flap. Ranjan Vepa, *University of London, U.K.* (**30**, 5, p. 1536) Technical Note

G07-170 Determining Strictly Positive Realness from System Modal Characteristics. Eric A. Mehiel, *California Polytechnic State University*; and Mark J. Balas, *University of Wyoming* (**30**, 5, p. 1539) Technical Note based on AIAA Paper 2005-5941

G07-171 Reachability and Optimal Phasing for Reconfiguration in Near-Circular Orbit Formations. Phil Palmer, *Surrey Space Centre, University of Surrey, U.K.* (**30**, 5, p. 1542) Technical Note

G07-172 Nonexplosive Approach to Fragment Subkilometer Asteroids with a Tether Centrifuge. Claudio Bombardelli, *ESA, The Netherlands* (**30**, 5, p. 1546) Technical Note

G07-173 Control and Simulation of Relative Motion for Aerial Refueling in Racetrack Maneuvers. Atilla Dogan and Eunyoung Kim, *University of Texas at Arlington*; and William Blake, *U.S. Air Force Research Laboratory* (**30**, 5, p. 1551) Technical Note based on AIAA Paper 2006-6710

G07-174 Attitude-Motion Estimation of Tumbling Objects Using Radio Frequency Identification. Hideyuki Tanaka, Takehisa Yairi, and Kazuo Machida, *University of Tokyo, Japan* (**30**, 5, p. 1557) Technical Note

G07-175 Optimal Rotation Angle About a Nonnominal Euler Axis. Fabrizio Giulietti and Paolo Tortora, *University of Bologna, Italy* (**30**, 5, p. 1561) Technical Note

G07-176 Artificial Equilibrium Points in the Low-Thrust Restricted Three-Body Problem. Mutsuko Y. Morimoto, *Japan Aerospace Exploration Agency, Japan*; Hiroshi Yamakawa, *Kyoto University, Japan*; and Kuninori Uesugi, *Japan Aerospace Exploration Agency, Japan* (**30**, 5, p. 1563) Article

G07-177 Separation Property for the Rigid-Body Attitude Tracking Control Problem. Dongeun Seo, *The University of Texas at Austin*; and Maruthi R. Akella, *Department of Aerospace Engineering and Engineering Mechanics* (**30**, 6, p. 1569) Article

G07-178 Homing Missile Guidance and Estimation Under Agile Target Acceleration. Robert H. Chen and Jason L. Speyer, *SySense Inc.*; and Dimitrios Lianos, *U.S. Army Space and Missile Defense Command* (**30**, 6, p. 1577) Article based on AIAA Paper 2006-6701

G07-179 Closed-Form Specified-Fuel Commands for Two Flexible Modes. Yoon-Gyung Sung, *Department of Mechanical Engeering, Chosun University, South Korea*; and William E. Singhose, *Woodruff School of Mechanical Engineering, Georgia Institute of Technology* (**30**, 6, p. 1590) Article

G07-180 Simulation and Flight Test of Autonomous Aircraft Estimation, Planning, and Control Algorithms. Mark E. Campbell, Jin-woo Lee, and Eelco Scholte, *Cornell University*; and David Rathbun, *The Insitu Group* (**30**, 6, p. 1597) Article

G07-181 Axial Velocity Solution for Spinning-Up Rigid Bodies Subject to Constant Forces. Mohammad A. Ayoubi and James M. Longuski, *Purdue University* (**30**, 6, p. 1610) Article based on AIAA Paper 2006-6655

G07-182 Optimal Linear Attitude Estimator. Daniele Mortari, *Texas A&M University*; F. Landis Markley, *NASA Goddard Space Flight Center*; and Puneet Singla, *University at Buffalo, State University of New York* (**30**, 6, p. 1619) Article based on AIAA Paper 00-129

G07-183 Modeling, Analysis, and Simulation of GPS Carrier Phase for Spacecraft Relative Navigation. Mark L. Psiaki and Shan Mohiuddin, *Cornell University* (**30**, 6, p. 1628) Article based on AIAA Paper 2005-6053

G07-184 Periodic Solutions in the Planar (n+1) Ring Problem with Oblateness. Antonio Elipe and Mercedes Arribas, *Universidad de Zaragoza, Spain*; and Tilemahos J. Kalvouridis, *National Technical University of Athens, Greece* (**30**, 6, p. 1640) Article based on AIAA Paper 2006-6748

G07-185 Linearized Dynamics of Formation Flying Spacecraft on a J_2-Perturbed Elliptical Orbit. Jean-Francois Hamel and Jean de Lafontaine, *Université de Sherbrooke, Canada* (**30**, 6, p. 1649) Article

G07-186 Stabilizing the Explicit Euler Integration of Stiff and Undamped Linear Systems. Pini Gurfil and Itzik Klein, *Technion—Israel Institute of Technology, Israel* (**30**, 6, p. 1659) Article

G07-187 Nonlinear Semi-Analytic Methods for Trajectory Estimation. Ryan S. Park and Daniel J. Scheeres, *University of Michigan* (**30**, 6, p. 1668) Article based on AIAA Paper 2006-6399

G07-188 New Synchronous Orbits Using the Geomagnetic Lorentz Force. Brett Streetman and Mason A. Peck, *Cornell University* (**30**, 6, p. 1677) Article based on AIAA Paper 2006-6804

G07-189 Modeling and Simulation of Airship Dynamics. Yuwen Li and Meyer Nahon, *McGill University, Canada* (**30**, 6, p. 1691) Article based on AIAA Paper 2006-6618

G07-190 Analytical Charge Analysis for Two- and Three-Craft Coulomb Formations. John Berryman and Hanspeter Schaub, *Virginia Polytechnic Institute and State University* (**30**, 6, p. 1701) Article

G07-191 Elastic Oscillations of the Space Elevator Ribbon. Stephen S. Cohen and Arun K. Misra, *McGill University, Canada* (**30**, 6, p. 1711) Article

G07-192 Performance and Lyapunov Stability of a Nonlinear Path Following Guidance Method. Sanghyuk Park, *Bombardier Aerospace Corporation, Canada*; John Deyst and Jonathan P. How, *Massachusetts Institute of Technology* (**30**, 6, p. 1718) Article based on AIAA Paper 2005-6230

G07-193 Robust Spacecraft Angular Rate Estimation from Vector Observations Using Interlaced Particle Filtering. Avishy Carmi and Yaakov Oshman, *Technion—Israel Institute of Technology, Israel* (**30**, 6, p. 1729) Article based on AIAA Paper 2005-6399

G07-194 Effect of Wind Correlation on Aircraft Conflict Probability. Georgios Chaloulos and John Lygeros, *Swiss Federal Institute of Technology, Switzerland* (**30**, 6, p. 1742) Article

G07-195 Boom and Receptacle Autonomous Air Refueling Using Visual Snake Optical Sensor. James Doebbler, Theresa Spaeth, and John Valasek, *Texas A&M University*; Mark J. Monda and Hanspeter Schaub, *Virginia Polytechnic Institute* (**30**, 6, p. 1753) Article based on AIAA Paper 2006-6504

G07-196 Adaptive Control Design Methodology for Nonlinear-in-Control Systems in Aircraft Applications. Amanda Young, Chengyu Cao, Vijay Patel, and Naira Hovakimyan, *Virginia Polytechnic Institute and State University*; and Eugene Lavretsky, *The Boeing Company* (**30**, 6, p. 1770) Article

G07-197 Essentially Globally Asymptotically Stable Nutation Control Using a Single Reaction Wheel. Dale A. Lawrence, *University of Colorado*; and Timothy E. Holden, *Ball Aerospace and Technology Corporation* (**30**, 6, p. 1783) Article based on AIAA Paper 2000-4047

G07-198 Optimal Trajectory Reconfiguration and Retargeting for Reusable Launch Vehicles. Patrick J. Shaffer and I. M. Ross, *Naval Postgraduate School*; Michael W. Oppenheimer, *U.S. Air Force Research Laboratory*; David B. Doman, *U.S. Air Force Research Laboratory*; and Kevin P. Bollino, *Naval Postgraduate School* (**30**, 6, p. 1794) Article

G07-199 Near-Optimal Feedback Rendezvous in Elliptic Orbits Accounting for Nonlinear Differential Gravity. Rajnish Sharma, Prasenjit Sengupta, and Srinivas R. Vadali, *Texas A&M University* (**30**, 6, p. 1803) Article

G07-200 Low-Thrust Interplanetary Transfers, Including Escape and Capture Trajectories. Yang Gao, *Chinese Academy of Sciences, China (ROC)* (**30**, 6, p. 1814) Technical Note

G07-201 Space Vehicle Conflict Probability for Ellipsoidal Conflict Volumes. Russell P. Patera, *The Aerospace Corporation* (**30**, 6, p. 1819) Technical Note

G07-202 Design of Static H_∞ Linear Parameter Varying Controllers for Unmanned Aircraft. Kannan Natesan, Da-Wei Gu, and Ian Postlethwaite, *University of Leicester, U.K.* (**30**, 6, p. 1822) Technical Note

G07-203 Relative Semimajor Axis Uncertainty in High Earth Orbits. Christopher Lane and Penina Axelrad, *University of Colorado, Boulder* (**30**, 6, p. 1827) Technical Note

G07-204 Linear-Matrix-Inequality-Based Robust Fault Detection and Isolation Using the Eigenstructure Assignment Method. Bilei Chen and Satish Nagarajaiah, *Rice University* (**30**, 6, p. 1831) Technical Note
